

## ***Certification in Process Safety Disciplines***

Primacert provides certification to process safety and risk management professionals. Certification is a voluntary process intended to recognize individuals who have met a defined standard of education, experience, practice, training, and knowledge in specific technical areas.

### **Why Primacert**

Primacert was established by Primatech in 2013 to certify process safety competence. Primatech has driven the global process safety industry with innovative approaches and a reputation for excellence since 1987.

Primatech continues this tradition by promoting competence management in process safety.

### **Need for Certification**

Process safety personnel play a critical role in protecting lives, property, the environment and company reputations. Certification provides companies with the assurance that personnel are suitably qualified and experienced to meet the challenges they face.

### **Benefits of Certification**

- Provides assurance that personnel are suitably qualified
- Demonstrates commitment to process safety and risk management compliance
- Enhances credentials and professional reputations of practitioners
- Demonstrates achievement of a defined performance standard
- Provides verification that studies have been performed by qualified personnel

### **Certifications Offered**

Certification is offered at three increasing levels of competency:

- Practitioner
- Specialist
- Expert

These levels are indicative of a progression in knowledge and understanding, and the ability to apply process safety skills.

Certification is available in the following specific technical disciplines:

- Process Hazard Analysis (HAZOP)
- Layers of Protection Analysis
- Process Safety Auditing
- Procedure Writing
- Process Safety
- Dust Hazard Analysis
